What is the role of a teacher?

The first thing that comes to people's minds when they think about the role of a teacher is that of a lecturer who gives lessons so that students can learn. But beneath the tip of the iceberg is so much more. People seem to forget about work before, during and after class. Behind the word "work" is not only the preparation and delivery of lessons. When preparing, you have to think of different

year.

We have WINNERS 🏆 already!!!

Congratulations 🎉

Since some of you needed to leave and I can't find all of you, here's the final part of the activity:

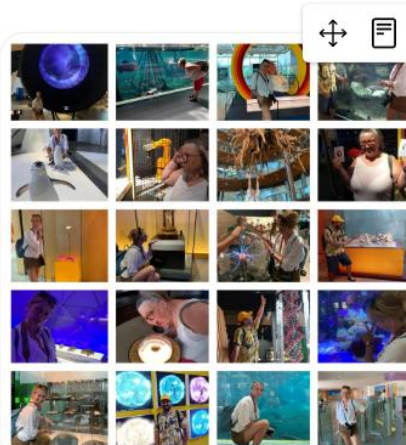

After spending some time going around the Museum, take some minutes to think about the things you've seen:

What did you like the

taken into classes.

What didn't you like?

The air conditioning 😞

Did you play with any of the objects on display?

As I stayed a little longer nearly with everything! Sometimes it was too crowded and I didn't want to wait.

Was there something you would like to have for yourself? If so, what and why?

I would like to have clown fish as they remind me of my childhood (Finding Nemo),
